

About NAB,s petition 04-160. This no different than the big networks fought against cable tv. I would think that sence it is a paid for service, and own by, in a big part, by clear channel, that this is the fcc fighting straw men. This is all about money. eather the fcc will raise, or impose a tax of some sort so the radio company can raise there fee for thair service. So thank you washington for higher stuff again!!!!

Maby if the local programing was worth a damm, satllite radio would not have such a market. So go ahead and take another choice awaqy and we the people will thank of something else.
